

Product Name: Modular_SciFi_Pack (146 Objects, LowPoly)

Developer: Oleksiy Sobolyev

Version: 1.1.0

1. Overview

Thank you for purchasing this asset pack!

Modular Sci-Fi Pack is a high-performance constructor for creating futuristic corridors, laboratories, and space station interiors. Fully updated for Unity 6 and URP.

2. Key Features:

Extreme Optimization: 146 models share a single Trim Sheet texture.

Grid Ready: Designed for seamless Vertex Snapping and fast assembly.

Advanced Materials: Ready-to-use shaders for transparent glass and bright Emission effects (Bloom-ready).

Low-Poly & VR Ready: Perfect for mobile, PC, and VR projects.

What's inside (146 Prefabs):

Walls, floors, ceilings, and modular doors.

Decorative elements: Pipes, cables, and wires.

Functional props: Control terminals, wall and ceiling lamps.

Added vertex-snapping support for easier level design (V).

3. Support
